Delivering better outcomes with PASS
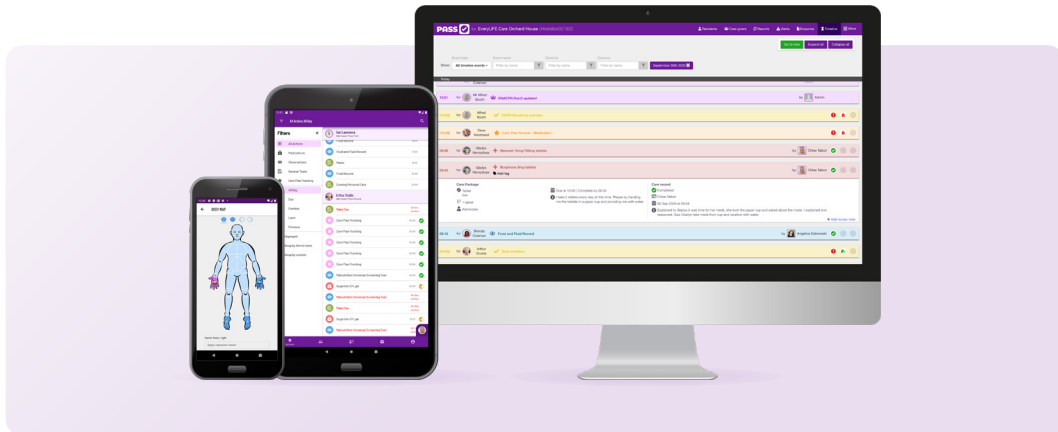

Helping hardworking care professionals to provide high quality care and support

PASS ✓
powered by everyLIFE

PASS is a digital care planning platform that has been co-developed with care managers and carers to help you safely meet the demands of your care service

PASS simplifies recording and monitoring the information you need to deliver truly person-centred care including:

- Clear details about the people you care about and what is important to them
- Personalised care activities, tailored for each person's needs
- Medication management, including a link to the dm+d, to minimise the risk of errors
- Incident reporting, allowing you raise and resolve safeguarding issues
- Assessments and observations.

It's really easy to create reports and see trends in the information you capture too. All of the information you record in PASS can be tracked, reviewed and tagged, allowing you to share it with families, commissioners, the regulator and allied care professionals.*

This frees up your time to spend where it matters most, with the people you care about.

Joining up Social Care with Health

PASS was the first digital care planning platform to provide direct real-time access to the GP notes of care recipients through NHSx's GP Connect. This award-winning innovation has seen many of the care professionals we support provide safer and more comprehensive care:

"Very simply, I could describe PASS GP Connect in just one word: Amazing! We were delighted to have been the country's very first care provider to access a GP record for a client in this way, and we now use it on a regular basis. It saves so much time and undoubtedly helps us to provide better care."
Andrea Baxter, Owner, Baxters Homecare

*The information family and friends can see is completely GDPR compliant and is consented to by the person you are caring for.

TESTIMONIALS

PASS is used by thousands of care professionals, every day, across all care settings to support the exceptional care they provide

"A tangible benefit that I have seen as a carer is the amount of extra time I now have to give care to the customer, which is what I do, which is what I am. I'm a care worker. I'm not a paperwork person."
Gary Carter, Care Worker, Bluebird Care (Lewes District)

"One family loved the idea that they could view their mother's care plan remotely on openPASS. That made them come to us and it's helped keep our home full."
Paula Key, Care Home Manager, Shangri-La Residential Home

"It's really all about being super-responsive, completely and utterly person-centred and then being 100% accurate. PASS makes all this a reality."
Rebecca McLennan, Registered Manager and Owner, Eidyn Care

"PASS saves an enormous amount of time. It's cut down on errors, improved accuracy and it's actually given us a lot of confidence in knowing that we have an accurate account of an individual's support needs."
Hazel McDonald, Head of Operations, Cantraybridge College

open PASS

powered by everyLIFE

openPASS helps family and friends feel more involved in the lives of their loved one, making the care you provide truly person-centred

Family and friends can use the dedicated app to see an overview of the care you're providing through PASS, ask questions, resolve issues and make specific requests, all in real time.

Over 1,000 care organisations use PASS to sustain and evidence high-quality care. We would love to support you to do the same.
